Docket No. 92-122 Exhibit No. MMB 15

Presented by Mass Media Bureau
Identified 11/12/92

Disposition: Received 11/12/92

Rejected

Reporter B. Lord

Date

not wish KOKS personnel to "walk on their roof."

CEBN will attempt to do all within its power to resolve the Smiths' legitimate interference complaints, but it can do little without cooperation from the Smiths. Mrs. Smith's initial letter to the Commission, dated October 25, closes with the allegations that the station has "ruined the looks of our country atmosphere and devalued our property by putting up that ugly tower. . . ." KOKS suggests that the Smiths may not ultimately be satisfied until the "ugly tower" and the station itself disappear, and clearly neither CEBN nor the Commission can satisfy that complaint.

Mrs. Smith has also had printed a broadside which invites residents of Poplar Bluff to write to her and complain concerning any alleged "electrical" interference which can be attributed to KOKS. A copy of this broadside will be forwarded to you when it is received. Once again, KOKS will do its best, in the spirit of cooperation, to resolve legitimate interference complaints. It cannot, however, resolve complaints without the good faith cooperation of the complainants, and it can do little if some complainant's chief avocation is drumming up more complaints.

- B. Paul D. Summer called on November 10 to report that a small TV in their household is receiving interference on channel 8. A KOKS representative has attempted to set up an appointment to install a filter, as yet unsuccessfully. Mr. Summer is a salesman, is often traveling, and has been especially difficult to contact.
- C. On November 28 Mary Wynn was contacted and she complained that she is receiving interference on channels 6 and 8. A station representative will visit Mrs. Wynn on Thursday, which is her day off, to evaluate

the situation, and, if necessary, install a filter.

- D. Mrs. Betty Anderson was first contacted on November 10, and a KOKS representative visited her on November 15. A filter was installed on her set, but the filter apparently did not work. A KOKS representative visited her again on November 30 and left her a new TV set while CEBN checks the grounding of her antenna system. Mrs. Anderson is not receiving interference on her "loaner" TV.
- E. KOKS representatives attempted to reach Mr. Randall Filo several times, unsuccessfully, before finally contacting him by phone on November 28. Mr. Filo complained of interference to channel 8, but KOKS has never been able to successfully set up an appointment to resolve the problem.
- F. Bill Hillis, when contacted by a KOKS representative, claimed that the only interference he was receiving was to the pay telephone in his trailer court. Mr. Hillis was informed that this interference could be cured by the installation of a filter on the phone, a task which would have to be done by the telephone company.

To recap, then, KOKS has acted diligently to meet and resolve legitimate interference complaints. Many of the complaints lodged by Poplar Bluff residents are based on KOKS' interference to channel 6, about which KOKS can do nothing. Many other interference complaints are based on the viewers' booster systems, which are specifically excluded from consideration of blanketing interference under section 73.318. Three interference complaints have not been resolved because KOKS representatives have not yet been able to schedule an appointment to visit the complainant (Paul D. Summer, Randall Filo, and Mary Wynn). KOKS has installed a filter on the TV set of, and repeatedly contacted Paul and Doris Smith. The results of these contacts have been unsatisfactory, however, and raise substantial questions concerning whether the Smiths are actually interested in having their interference problems resolved by any measure less drastic than moving the "ugly tower." Mrs. Anderson's problem has been

December 6, 1988
Page 5

resolved with a "loaner" TV, and her problem may ultimately be traced to the improper installation of her antenna system.

Finally, the new complaint brought to the station's attention yesterday, of Mr. Bill Hillis, will be investigated by station personnel. Mr. Bill Hillis is one of the original complainants, and, as noted above, his initial complaint concerned alleged interference to a pay phone in his trailer court. Mr. Hillis was not cooperative and would not request the telephone company to install a filter on his phone to cure the alleged interference. KOKS will, however, contact Mr. Hillis and determine if some cooperative steps can be taken to cure his alleged problem.

If you have any further questions, or receive any further complaints, Mrs. Raines, I hope you won't hesitate to give me a call.

Respectfully submitted,

Docket No. 92-122 Exhibit No. MMB16
Presented by Mason Media Bureau
Identified 11/12/92
Disposition: Received 11/12/92
Rejected
Reporter B. Lord
Date _____

Height of radiation center above
mean sea level (meters) : 259.0 259.0

Height of radiation center above
average terrain (meters) : 129.0 129.0

Overall height of antenna structure above ground (including obstruction
lighting, if any) : 123.0 meters

Obstruction marking and lighting specifications for antenna
structure:

It is to be expressly understood that the issuance of these specifications is in no way to be considered as precluding additional or modified marking or lighting as may hereafter be required under the provisions of Section 303(q) of the Communications Act of 1934, as amended.

Paragraph 1.0, FCC Form 715 (March 1978):

Antenna structures shall be painted throughout their height with alternate bands of aviation surface orange and white, terminating with aviation surface orange bands at both top and bottom. The width of the bands shall be equal and approximately one-seventh the height of the structure, provided however, that the bands shall not be more than 100 feet nor less than 1 and 1/2 feet in width. All towers shall be cleaned and repainted as often as necessary to maintain good visibility.

Paragraph 3.0, FCC Form 715 (March 1978):

There shall be installed at the top of the structure one 300 m/m electric code beacon equipped with two 620- or 700-watt lamps (PS-40, Code Beacon type), both lamps to burn simultaneously, and equipped with aviation red color filters. Where a rod or other construction of not more than 20 feet in height and incapable of supporting this beacon is mounted on top of the structure and it is determined that this additional construction does not permit unobstructed visibility of the code beacon from aircraft at any normal angle of approach, there shall be installed two such beacons positioned so as to insure unobstructed visibility of at least one of the beacons from aircraft at any normal angle of approach. The beacons shall be equipped with a flashing mechanism producing not more than 40 flashes per minute nor less than 12 flashes per minute with a period of darkness equal to approximately one-half of the luminous period.

③

Paragraph 12.0, FCC Form 715 (March 1978):

On levels at approximately two-thirds and one-third of the over-all height of the tower, there shall be installed at least two 116- or 125-watt lamps (A21/TS) enclosed in aviation red obstruction light globes. Each light shall be mounted so as to insure unobstructed visibility of at least one light at each level from aircraft at any normal angle of approach.

Paragraph 21.0, FCC Form 715 (March 1978):

All lighting shall burn continuously or shall be controlled by a light sensitive device adjusted so that the lights will be turned on at a north sky light intensity level of about 35 foot candles and turned off at a north sky light intensity level of about 58 foot candles.

Special operating conditions or restrictions:

1. Neither the horizontally nor vertically polarized radiation component shall exceed the following value at any azimuth.

100 KILOWATTS

2. Each component shall be restricted to the following values at the azimuths specified below.

36.5 KILOWATTS AT 40 DEGREES TRUE
36.5 KILOWATTS AT 72 DEGREES TRUE
36.5 KILOWATTS AT 100 DEGREES TRUE

3. In addition, neither radiation component shall increase at a rate exceeding 0.2 dB per degree from the azimuths of restricted radiation specified above nor exceed a maximum-to-minimum ratio of 15 dB. The rms of the vertically polarized radiation pattern shall not exceed that of the horizontally polarized radiation pattern.

RE: Partial Response to Petition

Dear Mrs. Raines:

Calvary Educational Broadcasting Network (CEBN) has diligently attempted to contact and address the concerns raised in the written petitions you enclosed in your letter of December 22. With a few exceptions, those complaints and concerns have been addressed, but to assist you, I have broken the complaints down in broad categories, and have included Mrs. Stewart's notes with respect to each complaint.

I. No Compliant or Complaint Withdrawn (5)

A majority of these people receive cable service and do not remember signing the petitions. They do not now claim any interference. These complaints include those of: Elizabeth Hart; John Mosley (sp.); John E. Masters; Eileen Kinney; and Linda Stober (sp.).

II. Complaint Limited to Channel 6 (18)

Although KOKS need not protect Channel 6 reception in its area, Mrs. Stewart has been informing folks who complained about the loss of Channel 6 about the installation of filters that will allow Channel 6 to be received. These complaints included Andy Diel; Hugh Beights; Nadine Balla (sp.); Barbara Johnson; Willard A. Garrison; Golda Harris; Boris Johnkoff (sp.); Karen R. McCullen; Tammy Earls; Fred Dicker; Roger Tournay (sp.); Victoria Pennell; D.B. Harris; Charles L. Hillis; Daniel H. Downdawn (sp.); David Coulson (sp.); Nancy Coulson.

mmB
Ex. 17

①
①

January 24, 1989

Page 2

III. Boosters (13)

A number of complainants have boosters, and were complaining about Channel 6 interference. However, KOKS has either informed complainants of the proper filter to install or provided such filters. These complainants include: Mrs. Ted Williams; Marie S. Christian; Dorothy Robbins; Mark and Gerryl Young; Scott L. Lundstrom (sp.?); Charles R. Sisk; Daniel L. Denton; Buddy Goodwin; Joseph E. Hecker; Georgia Young; M.J. Martin; Mrs. H.M. Hendrickson; and Stanly M. Buerch.

IV. Complaints Resolved (9)

These complaints have apparently been resolved by the installation of filters, and include: Sandy Hall; Leatha Piper; Freida Doris (sp.?); Mike Pennington; Betty Johnson; Larrie Chaffin (sp.?); Mary J. Wynn; Larrry Walton; Wallace and Naomi Connes (sp.?)

V. Complaints Waiting to be Resolved (4)

In several instances KOKS has contacted complainants and has been unable to resolve the complaint because of an inability to find a convenient time (for the complainant) to visit the complainants home or the unavailability of certain filters. These complaints include the following: Barbara Lewis; David Birdsong; Judy Cox; and Mrs. J.M. Middleton.

VI. Unable to Reach Complainant by Telephone, Letter Sent (35)

Because many of the signators on the petition did not leave their phone number, CEBN has been unable, in many instances, to contact these parties by phone. Accordingly, letters requesting these complainants to call or come by the station's office during regular business hours were mailed on January 11 and January 17. Two letters sent on January 11 have already been returned for insufficient address, including those addressed to: D. Taylor and Christy T. Hyde. The attached letters were sent to the following people: Hershall Jewell; Sheila Dick; Janet S. Smith; Debbie Webb; Chester Stratton; Mary J. Clemons; Don Brady; Karen Ward Gerald Willis; Debra M. Practor; Tammy Tarman; Iva Neil; Sherri Goff; Mary Maught; Jim Farley; Ed Lee; Bonnie Wallon; Cleta Kearleau; Elois and Francis Wells; Jerry Dee; Steve Bornno; Donald Campbell; Roy Parr; Rev. Eldon Kirks; John Pallis; Larry Pole; Volite Kirks; Virgil Campbell; and Luther M. Jenson. Several letters were simply sent to addresses.

FEDERAL COMMUNICATIONS COMMISSION

Docket No. 92-122 Exhibit No. MMB17

Presented by Mass Media Bureau

Identified 11/12/92

Disposition: Received 11/12/92

Rejected

Reporter B. Lord

Date

VII. Failure to Cooperate (6)

Many complainants could not be satisfied because they failed to cooperate, either in refusing to allow KOKS personnel on their property to install filters, by failing to install the filters supplied, or by failing to change or repair equipment that clearly was at fault. These include: Ellen Malone; Phyllis Buerck; Bette Anderson; Jennie Davidson; Randy Soens; and Thomas Crutchfield.

VIII. Miscellaneous Responses

KOKS has responded to many complainants which did not come through petitions. Mrs. Stewart's records concerning her contacts with these persons is included in Section VIII. Dan Sullivan's complaints was resolved. Several others, including those of Paul D. Summers, Clara Freeman and Jean Hillis await resolution because of the unavailability of necessary filters. Some complaints await resolution because Mrs. Stewart cannot contact the complainants, including: Joanne Dobbs; Doris Smith, Randall Filo; and Bonnie Walton. Many of the complaints are based on Channel 6 problems, including those of Earl Dement; Sandra Durbin; William Cary; Buford Smith; Gerald Malstrom; Lillian Frey; Betty Sliger and Leta Sliges. Other complainants, such as Elizabeth Davis, Ray Pennington, Marjorie Bacon and Getty Ketchnerside have boosters.

Some persons, regrettably, have complained repeatedly concerning interference but have failed to cooperate with KOKS attempts to resolve the problem. These complainants include: Henry Priest; Elmer Soens; and, Bud Korsen.

Finally, several complainants, when contacted, stated that they no longer were receiving interference, including Mr. and Mrs. Rick Adams; June Porter; Helen Birdsong; and Betty Stroud.

IX. Other Matters

I have enclosed a copy of a lawsuit filed by the Smiths, Randy Soens and Thomas Crutchfield which names CEBN as a defendant. The allegations are self explanatory. Please be advised that litigation is now pending concerning this matter, and that your conversations with the Smiths', Soens' (Randy and Elmer) and Mr. Crutchfield may have an impact on that litigation.

In another incident, noted in the enclosed newspaper article, KOKS antenna and transmission line received extensive (and expensive) damage from a gunshot. The station was forced to go

3

3

January 24, 1989
Page 4

off-the-air to effect costly repairs. As you can imagine these two developments have made the station's attempts to amicably resolve the complaints inordinately more difficult and expensive.

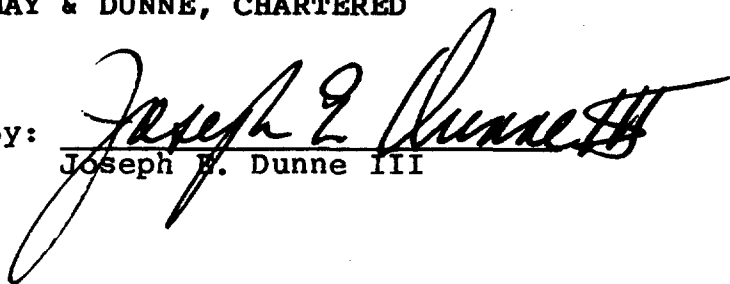

CEBN, through the undersigned, will keep you fully advised of its progress in resolving these complaints.

If you have any questions concerning this matter, please do not hesitate to give me a call.

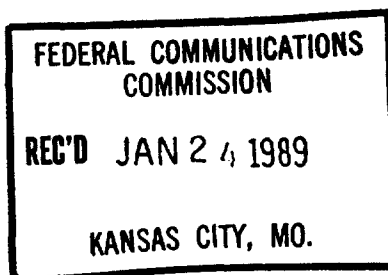

Very truly yours,

MAY & DUNNE, CHARTERED

CALLER ON 12-30-88 AT 2:25 P.M. SAID SHE DID NOT REMEMBER SIGNING
A PAPER SHE IS ON CABLE NO INTERFERENCE

Are you having electrical difficulties due to the radio signals from KOKS FM radio station?

Most people in this area cannot receive channels 6, 15, or 8 during the day due to the radio programming of KOKS. Channel 12 is weak and some music is picked up on it during the daytime hours.

The radio station shuts down at 6:00 p.m. and starts again during the morning hours. This is only temporary, they are going to 24 hour broadcasting 100,000. watts very soon. *New 24 hrs.*

We have been told by the KOKS radio station "We will be staying on the air, everything will stay like it is and you might as well get use to it. You will never be able to pick up channel 6 again and were not responsible for interference on radios, TV's, tape players ect."

People are being out money to see why their TV's and radios are not working right. People do not know why their having these electrical difficulties the past month or so, we hope this letter will let you know what is going on. As you read this letter please support this effort to solve this problem.

Many items and necessary equipment is being effected in our households and businesses. TV's, radios, telephones, computers, and stereo systems. Tape players play the radio signals with the tape. Any electrical or battery operated playing instruments with speakers receive the radio station signals, burgular alarm system, and baby monitors also receive the radio station signals.

If your receiving the radio station signals on your TV, it will be blocked out, snowy with static, or a blank picture. On your stereo systems and radios you will frequently receive only KOKS radio signals or it will blend in with the station your wanting to listen to.

Many people are confined to their homes due to illness or age, also many young children do not enjoy regular programming or items for enjoyment and entertainment.

We are not trying to put the KOKS FM radio station out of business, we are just wanting their radio signals not to interfere with our necessary household and business items.

We have tried for over a month to get these problems solved. The radio station seems to think everything is okay, but we need to let the station know these problems exist.

These letters will be sent to necessary offices so we can get help for the people receiving this radio interference. The only way we can stop this is by joining together and letting them know what is happening to the public at large. It is not right for anyone to monopolize or dictate the airways.

CALLLED ON 1-2-89 AT 1:20P.M. WAS TOLD SHE IS ON CABLE IN
POPLAR BLUFF, AND DO NOT HAVE ANY INTERFERENCE.

Are you having electrical difficulties due to the radio signals from KOKS FM radio station?

Most people in this area cannot receive channels 6, 15, or 8 during the day due to the radio programing of KOKS. Channel 12 is weak and some music is picked up on it during the daytime hours.

The radio station shuts down at 6:00 p.m. and starts again during the morning hours. This is only temporary, they are going to 24 hour broadcasting 100,000. watts very soon. NOW 24 HRS.

We have been told by the KOKS radio station "We will be staying on the air, everything will stay like it is and you might as well get use to it. You will never be able to pick up channel 6 again and were not responsible for interference on radios, TV's, tape players ect."

People are being out money to see why their TV's and radios are not working right. People do not know why their having these electrical difficulties the past month or so, we hope this letter will let you know what is going on. As you read this letter please support this effort to solve this problem.

Many items and neccessary equipment is being effected in our households and bussinesses. TV's, radios, telephones, computers, and stereo systems. Tape players play the radio signals with the tape. Any electrical or battery operated playing instruments with speakers receive the radio station signals, burgular alarm system, and baby monitors also receive the radio station signals.

If your receiving the radio station signals on your TV, it will be blocked out, snowy with static, or a blank picture. On your stereo systems and radios you will frequently receive only KOKS radio signals or it will blend in with the station your wanting to listen to.

any people are confined to their homes due to illness or age, also many young children enjoy regular programing or items for enjoyment and entertainment.

We are not trying to put the KOKS FM radio station out of business, we are just wanting their radio signals not to interfere with our neccessary household and business items.

We have tried for over a month to get these problems solved. The radio station seems to think everything is okey, but we need to let the station know these problems exist.

These letters will be sent to neccessary offices so we can get help for the people receiving this radio interference. The only way we can stop this is by joining together and letting them know what is happening to the public at large. It is not right for anyone to monopolize or dictate the airways.

Please support your rights by mailing this letter to: Dorris Smith

We watch Channel 6 on Saturday night, our favorite shows are on then. We had terrible interference on all the shows. we are senior citizens & don't get out much.

Sat. Dec. 3rd was the first night we had trouble. Daytime is worse problems.

(13)

CALLLED 12-30-88 AT 2:50 P.M. CHANNEL 6 IS OUT TOLD ABOUT
A FILTER.

----- programming of AUSA. Channel 12 is weak and some music is picked up on it during the
daytime hours.

The radio station shuts down at 6:00 p.m. and starts again during the morning hours. This
